

The FCC should not implement any proposal that will lessen Indian's NO CALL private policy law. I use to receive 3 to 5 calls a night related to unsolicited calls. I now receive none! I feel that this Indiana law is very important in keeping the people of indiana free from harrassment from telemarketers that are selling private information and constantly bothering people.

I think that the Federal government has taken too long to respond and will not do a enough to prevent unsolicited phone calls to any residents.
